

On a long enough timeline the survival rate for everyone drops to zero.

"We're Looking At Serious Civil Unrest Regardless Who Wins" - Martin Armstrong Fears Post-Election Chaos

BY TYLER DURDEN

Almost everything you see and hear with the Lying Legacy Media and the government is a lie.

Just this past week, the Biden Administration backtracked about employment as it was widely reported, ["US economy added 818,000 fewer jobs than first reported in year that ended in March."](#) A huge miss or a huge lie - take your pick.

Other big lies we have been told in recent years: *"Trump is colluding with Russia," "Hunter Biden's laptop is Russian disinformation, and the "CV19 vax injections are "safe and effective."*

That is just scratching the surface of the lies we are told on a daily basis. The lies, which people realize are becoming preposterous, are adding to the public's lack of confidence in everything, including the economy.

Martin Armstrong says, ***“We are in a period of great uncertainty. . . . When people are uncertain, they don’t spend. They save. That’s what happens in a depression and a recession...”***

“So, if you have no confidence in the future because of all this crazy stuff going on, what do you do? You don’t borrow, and you pull back and say let me see what is going to happen.”

Armstrong says another big lie told to the public is the approval rating of Kamala Harris.

The so-called polls say Harris is running neck and neck with Donald Trump in the presidential race. Don’t believe it. Armstrong says a recent data dive on his Socrates computer program shows:

“Kamala’s approval rating came in around 10.5 %.

(A second confidential source says Kamala’s approval rating is 8.5%.) Confidence in government is 7%. So, how can Kamala possibly be 40%, 50% and 60%? It’s illogical...

The polls are really propaganda at this point. They were propaganda back in 2016. They all said Hillary would win, and she would sweep Trump under the carpet.”

On news RFK Jr. suspending his campaign and endorsing Trump, Armstrong says,

"I was always pushing RFK Jr. to be Attorney General. I think I got his eyes to light up when I said if you take the Attorney General job, you could even indict Pfizer."

Armstrong says the Trump camp is seriously considering RFK Jr. for AG, and Armstrong says he has been in contact with top Trump advisors.

We will see, but we do know RFK Jr. is going to be a part of Trump's Administration.

On Trump winning in November, Armstrong says, ***"Look, the computer says Trump should win. I don't know how the hell they allow that to happen.."***

"They have to trap Trump into a war or they kill him, one or the other. These people are unconscionable..."

We are looking at serious civil unrest regardless of who wins in November. Neither side is going to accept it."

On gold at \$2,500 an ounce, Armstrong says it's not about inflation, it is about the fear of a US debt default. This is why central banks are buying. Armstrong says,

"If there is a big war, the US will default on it's debt. . . I am very concerned they will start WWIII before the end of the year and maybe by September."

There is much more in the 54-minute interview.
